

PA1 & PA6 Safe Use of Pesticide is suitable for

- Forestry
- Agriculture
- Horticulture

Pesticides are very widely used in the land based industry but are often hazardous substances. Therefore they must be handled carefully, applied in accordance with manufacturer guidance and stored correctly. This course will help you gain these skills and ensure compliance with relevant legislation. Fines for improper use are significant.

After the 26th of November 2015, pesticide suppliers will not sell pesticides to you if you have not successfully completed and passed the PA1 and PA6 training.

Both courses include an assessment which if you pass will then result in the issue of your **PA1 & PA6 Certificate of Competence In Safe Use of Pesticides certificate.**

www.highlandbirchwoods.co.uk

Dates for the Courses
18th and 19th February 2015
